## 10 reasons to choose wool

1. **Pure wool is 100% natural**, 100% renewable, 100% sustainable, 100% biodegradable, if you love the planet – use more wool!
2. **It is warm** but it is cool too because it adapts to the wearer – that's why sheep are so snug and content!
3. **Wool is flame retardant** and will often self-extinguish. Fire-fighters like it because it produces less smoke and toxic fumes – making it a safer choice for the home.
4. **Strong and long lasting** – wool carpets and rugs can take lots of heavy wear and are known to look better for longer – quality always lasts!
5. **Easy care & stain resistant** – The protective waxy coating on wool fibres makes wool products resistant to staining and they also pick up less dust as wool is naturally anti-static. Innovations in white goods and wool processing mean that wool items are no longer hand-wash only. Many wool products can now be machine-washed and tumble dried.
6. **Wool has hypoallergenic and anti-bacterial properties** – it makes the air that we breathe cleaner and better.
7. **UV protection** – As a natural fibre, evolved over millions of years to protect sheep against the elements, wool absorbs UV radiation providing protection from the sun.
8. **Insulate with it**, soundproof with it, wear it, walk on it, wrap things with it. The world's oldest renewable fibre is also the most versatile and modern.
9. **Sheep are amazing** – they graze peacefully, grow wonderful wool, we use it to make beautiful textiles and the whole process begins again... no depletion, just sustainable and sensible.
10. **Wool is smarter than any other fibre** it travels a long way on its journey from the sheep to finished product but it never loses any of its remarkable qualities and it looks and feels fabulous too.

All of our wool growers respect the 5 animal freedoms & are mulesing\* free

1

Freedom from hunger and thirst

2

Freedom from discomfort

3

Freedom from pain & disease

4

Freedom from fear & distress

5

Freedom to express normal behaviour

\*Mulesing is a practice in which skin is removed from the rear of the sheep, to prevent flies from laying their larvae on the sheep. This process is carried out without anaesthetic. All our wool is produced **without** mulesing.
